AVINASH KOKARE

Sr. Software Engineer | Mumbai, India | +91 9892583723 | avi1999kokare@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Sr. Software Engineer with 5+ years of experience building scalable, high-performance web applications. Expertise in frontend architecture, performance optimization, and large-scale monolithic and micro-frontend applications, with hands-on experience developing backend services and REST APIs, and applying distributed systems and system design principles to build reliable, maintainable software.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python
- **Frontend:** React.js, Next.js, React Native, HTML5, CSS3, Shopify Hydrogen
- **Backend:** Node.js, Express.js, REST APIs
- **Datastores:** PostgreSQL, MongoDB, Redis
- **Cloud & DevOps:** Docker, AWS, Nginx, GitHub Actions
- **Architecture & Concepts:** System Design, Microservices, Performance Optimization, Core Web Vitals
- **Tools:** Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

OZiva (HUL) — *Sr. Software Engineer* (Oct 2022 – Present)

- Took ownership to migrate OZiva's headless e-commerce platform from a custom **React.js** storefront to **Shopify Hydrogen (SSR)**, improving **Google PageSpeed scores from 20 - 25 to 75+**, reducing **bounce rates by 30–35%**, and increasing **conversion rates (CVR) from ~2–3% to ~4–5%** through **Server-Side Rendering (SSR)**, optimized rendering strategies, and **Core Web Vitals** improvements. Established a **scalable frontend architecture** that accelerated feature delivery and enhanced the overall customer experience.
- **Modernized the frontend architecture** by introducing a **feature-based modular architecture**, improving **code maintainability**, **scalability**, and **developer productivity**. Optimized bundle delivery using **React Server Components**, **code splitting**, **lazy loading**, and **render optimization**, significantly improving **application performance** and the overall user experience.
- **Delivered business-critical customer journeys** across **Web** and **React Native** applications by building scalable frontend features, integrating **Razorpay** as a cost-effective payment solution, and implementing **GA4**, **Google Tag Manager**, and **Mixpanel** analytics. Partnered with Product teams to drive **A/B testing**, enabling **data-driven product decisions**, continuous **conversion optimization**, and improved customer engagement.
- **Engineered secure RESTful APIs** within a **microservices architecture** using **Node.js** and **Express.js**, implementing **JWT-based authentication (Access & Refresh Tokens)**, standardized request validation, and reusable service layers to build **secure**, **scalable**, and **maintainable backend services** powering critical e-commerce workflows.
- **Improved backend performance and scalability** by implementing **Redis caching** for frequently accessed business data, reducing **database load** and **API response latency**, while leveraging **Kafka-driven asynchronous event processing** for reliable **order notification workflows**, improving **system responsiveness**, **operational resilience**, and supporting **high-traffic production workloads**.
- **Maintained platform reliability** during **3–5x traffic spikes** by proactively identifying performance bottlenecks, optimizing frontend performance, and collaborating with backend teams on **scalability strategies**, ensuring a **seamless customer experience** during business-critical sale events.
- **Collaborated closely with Product, Design, QA, and Backend teams** throughout the software development lifecycle to prioritize **high-impact initiatives**, rapidly resolve **production issues**, and

actively contribute to **architecture discussions** that improved long-term **code quality**, **maintainability**, and **engineering standards**.

- **Mentored 2 junior engineers and 4 interns** through **technical guidance**, **code reviews**, **debugging sessions**, and **architecture discussions**, promoting **engineering best practices**, accelerating onboarding, and improving overall **team productivity** and **software quality**.
- **Integrated AI-assisted development workflows** using **Google AI Studio** to accelerate frontend implementation by generating production-ready UI scaffolding, followed by **engineering review**, **refactoring**, and **performance optimization**, reducing **feature development time by 35–40%** while maintaining **production-grade code quality** and engineering standards.

Blue Bricks — *Full Stack Engineer (*Jul 2022 – Oct 2022)

- Contributed to the development of full-stack web applications, building and maintaining production-ready features while collaborating with senior engineers throughout the development lifecycle.
- Integrated **AI/ML APIs** into existing applications by implementing backend logic to fetch, process, and transform AI-generated responses into structured data, enabling dynamic and interactive user experiences on the frontend.

Cere Labs — *Software Engineer* *(*Jun 2021 – Jun 2022)

- Built and maintained **internal engineering tools** that simplified developer workflows, improved operational efficiency, and supported day-to-day engineering activities across multiple teams.
- Delivered new features and resolved production issues for applications, contributing to application stability, maintainability, and an improved user experience while collaborating closely with senior engineers.
- Enhanced backend processing by implementing **Redis caching**, **RabbitMQ-based asynchronous workflows**, and **Python (Pandas)** data processing, improving execution efficiency and supporting reliable processing of business-critical workloads.
- Collaborated with the team to improve the application, enhancing sensitive information detection and contributing to more accurate and secure document-processing workflows.
- Contributed to backend API development and system integrations while gaining hands-on experience with **containerized deployments using Docker**, modern software delivery practices, and production support.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Engineering (2017 – 2021)
Vidyalankar Institute of Technology, Mumbai — University of Mumbai
